

Microwave vacuum equipment

Features and advantages of microwave vacuum machinery:

1. Good characteristics of not discharging exhaust gas and wastewater during work to realize its value and protecting our surrounding environment
2. We have different types of microwave equipment to meet your different needs.
3. Microwave vacuum machine has simple operating system, uniform heating and fast speed.
4. Microwave vacuum machine is an automatic device, which greatly saves labor costs.
5. Short delivery time. We have experienced workers who can manufacture microwave vacuum equipment or other **Microwave degreasing equipment** in a short time.

Our microwave vacuum machines are divided into different types according to the power. Our microwave vacuum equipment company can provide you with microwave heating equipment of various power types. They all have excellent quality and competitive microwave equipment prices, so they are favored by customers in all regions.

			
12kw Microwave vacuum equipment	30kw Microwave vacuum equipment	50kw Microwave vacuum equipment	higher power microwave vacuum equipment Can be customized

Product Specification:

Model	DL-12 KW	DL-30KW	DL-50KW	DL-80KW
Microwave frequency	2450/915MHz	2450/915MHz	2450/915MHz	2450/915MHz
Output power	12KW	30KW	50KW	80 千瓦 KW
Drive Speed	0-5m /minute (adjustable)	0-5m /minute (adjustable)	0-5m /minute (adjustable)	0-5m /minute (adjustable)
Leakage value	$\leq 3\text{mw}/\text{m}^3$	$\leq 3\text{mw}/\text{m}^3$	$\leq 3\text{mw}/\text{m}^3$	$\leq 3\text{mw}/\text{m}^3$
Size	7000x840 x1800mm	10500x840 x1800mm	12500x1200 x1800mm	15000x1400 x1800mm
Equipment Output	120-150kg /h	300-400kg /h	500-600kg /h	800-1000kg /h

Organoleptic analysis of three cranberry samples dried using three different drying methods.

Drying method	Color	Texture	Taste	Overall appearance
MW-vacuum	3.0	2.8	3.3	2.8
MW-convective	3.2	3.3	3.7	3.0
Convective	4.0	3.7	4.0	4.2

In recent years, microwave-vacuum drying has been found as a potential method for obtaining high quality dried foodstuffs. Microwave-vacuum drying combines the advantages of both microwave heating and vacuum drying.

The low temperature and fast mass transfer conferred by vacuum combined with rapid energy transfer by microwave heating generates fast drying at low temperature and thus it has the scope to improve energy efficiency and product quality. Some foods like grains, fruits and vegetables have been successfully dried by microwave-vacuum drying techniques.

Our after-sales service is thoughtful and thoughtful, and has been sold all over the world for many years. Many loyal customers will test for you and order peace of mind. Consultation service is provided free of charge before purchase. It will be debugged and installed for you free of charge at the time of purchase. You will still be able to answer questions in time after purchase. If necessary, you can go to the door for maintenance inspection. The tradition of regular return visits is also well received. If you are interested in purchasing our machines, please visit our factory. Our engineers will show you the workflow and test the final product for you. Or you can send us a query to learn more about the cost of microwave vacuum equipment.
